Top 3 stories generated by CSU, Jan. 19-26

1. This Scientist Thinks Cannabis Could Be A Wonder Drug For Treating MS– Huffington Post – readership of 14 million

A growing number of anecdotal reports describe the drug's benefits for treating common symptoms like fatigue, muscle weakness, anxiety and sleep deprivation, according to Dr. Thorsten Rudroff, a Colorado State University neurophysiologist who has conducted research on the effects of marijuana on multiple sclerosis symptoms.

2. Meet The Newest Blood Repelling Material Designed For Medical Implants – Forbes – readership of 9 million

Chemistry could provide an answer, according to Colorado State University researcher Ketul Popat.

3. Why We Shouldn't Tell Workers When to Unplug– TIME - readership of 6 million

A recent study from Colorado State University found that just thinking about having to answer email at home (a.k.a. "anticipatory stress") renders employees "emotionally exhausted," which can hurt morale.

Top 3 stories not generated by CSU, Jan. 19-26

1. States Expected To Continue Course Toward Clean Energy Future – Huffington Post – readership of 14 million

These are well-respected, "card-carrying conservatives who understand the benefits of the clean energy agenda," said former Democratic Gov. Bill Ritter of Colorado, who is now director of the Center for the New Energy Economy at Colorado State University.

2. Looming cyclone may break a record drought for Australia's region – Sydney Morning Herald – readership 2 million

"There have only been two named storms so far in the southern hemisphere season and zero hurricane-strength storms," Dr Klotzbach, a research scientist at Colorado State University, said. "On average, we should have had 10 named storms and five hurricanes so far."

3. Environment freeze-out: Trump administration imposes halt to EPA grants and contracts - Salon.com – readership 1 million

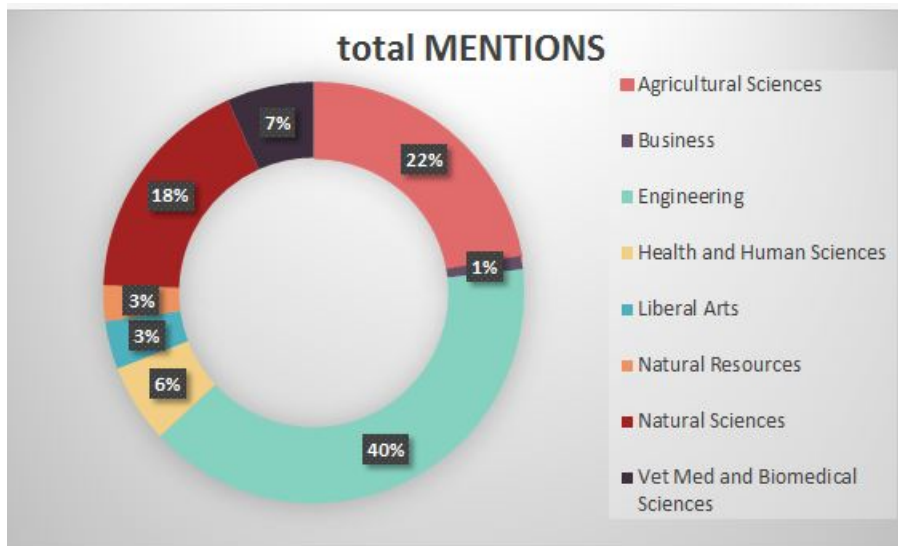

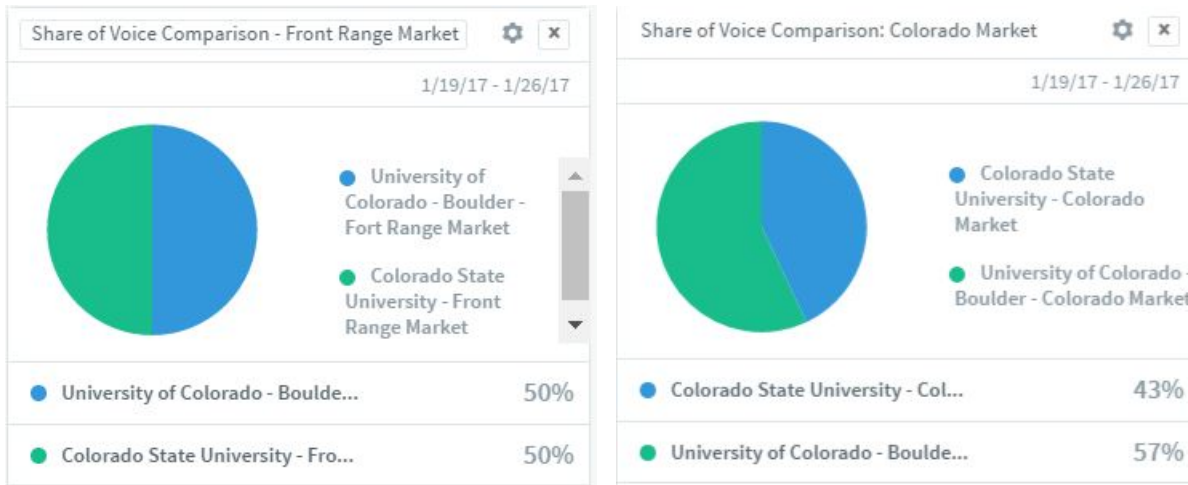

More than 600 active contracts with businesses ranging from small minority-owned consulting companies to institutions as big as Colorado State University can be explored here.

Top 2 aggregator stories, Jan. 19-26

1. Blood refuses to go anywhere near this new medical implant material – Yahoo News, Yahoo Sports – readership of 15 million

A research project coming out of Colorado State University is suggesting a different, less conventional approach: A new type of "superhemophobic" titanium surface that's so repellent to blood that, in theory, your body won't even realize an implant is there.

2. **Morris Animal Foundation Announces 2017 Feline Research Grants– Yahoo Finance – readership of 7 million**
 Through the grants, totaling nearly \$568,000, the Foundation is supporting five research teams at four universities including the University of Illinois, **Colorado State University**, North Carolina State University, and the University of California, Davis.
